

Release Note for Vigor2925 Series

Firmware Version:	3.8.9.8
Release Type:	Normal
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- None.

Improvement

- Improved: Support specifying the Failover Interface for TR069 Client function.
- Improved: Support the IP address as a provider host in a customized DDNS profile.
- Improved: Add a restriction for welcome message, on System Maintenance >> Login Page Greeting.
- Corrected: An issue of sending the license sync everyday.
- Corrected: An issue of sending CPE notification with empty value when there are frequent login attempts.
- Corrected: An issue of requiring to enter the password twice for creating the connection to Vigor router, for Win10 IKEv2 EAP Client.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.
