Release Note for Vigor2925 Series

Firmware Version:	3.9.1
Release Type:	Normal
Applied Models:	Vigor2925 Series

Vigor2925 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- None.

Improvement

- Improved: Add a new telnet command to turn on/off the validation code feature.
- Corrected: An issue of LAN DNS stopped working.
- Corrected: An issue of global IPv6 address obtaining.
- Corrected: An issue of IPSec VPN disconnection every 60 minutes.
- Corrected: An issue of "wol fromWan" configured via Web Console.
- Corrected: An issue of ticking Use SSL option in SMS / Mail service object.
- Corrected: An issue of L2TP over IPsec tunnel disconnected due to DPD timeout.
- Corrected: An issue of Web Login failure when the validation code feature is enabled.
- Corrected: An issue of the router not using the Internet IP to do DrayDDNS update when it was behind NAT.
- Corrected: An issue that packets of LAN host not be routed to NATed IPsec Xauth tunnel even the policy-route rule was enabled.

Known Issue

- The WAN port can not work well with Alcatel I-040G device. The quick solution is to add another switch between Vigor2925 and Alcatel I-040G.
