Release Note for VigorAP 912C

Firmware Version:	1.4.4
Release Type:	Normal
Applied Models:	VigorAP 912C

VigorAP 912C is a ceiling-mount Wi-Fi for business networks. It has a capacity of up to 256 concurrent active users, ideal for a high-density environment such as a BYOD workplace. The low-profile appearance and PoE power supply provide the flexibility in deployment.

New Features

- None.

Improvement

- Improved: Support AP management using SSH.
- Improved: Modify the warning message in Fast Roaming setting.
- Improved: Add a note and a pop-up alert to notify the user not to enable Management VLAN when using the Mesh function.
- Corrected: An issue of WiFi connection stability.
- Corrected: A display issue of schedule status indicator if Daylight Saving was enabled.
- Corrected: An issue of TR-069 failure due to the Stun client missing a recheck mechanism.
- Corrected: An issue of login device by using the admin password (set with special character "&").
- Corrected: An issue of WiFi client not being pinged due to the same VLAN ID configured for management VLAN and SSID.

Known Issue

- None.
