Release Note for VigorSwitch Q2200x

Firmware Version:	2.9.9
Loader Version:	3.5.1
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied Models:	VigorSwitch Q2200x

VigorSwitch Q2200x, 16-port 2.5G with 4-port 10G SFP+ L2+ Managed Switch, is a standard switch that meets both IEEE 802.3u/ab/bz Fast Ethernet and Gigabit Ethernet specifications.

New Features

- None.

Improvement

- Corrected: An issue with syslog format preventing VigorACS from collecting logs correctly.

Note

- After upgrading the firmware with this version, downgrading to the previous version (e.g., V2.7.x) is not allowed if the boot loader was 2.2.0.
- STP (Spanning Tree Protocol) is enabled by default starting from firmware version 2.9.8, which may result in a slightly longer link-up time for ports.
