

Release Note for SmartVPN Client

Firmware Version:	5.6.1
Release Type:	Normal
Applied Operation System	Windows XP SP3, Vista 32-bit/64-bit, Windows 7 32-bit/64-bit, Windows 8, Windows 10, Windows 11, Windows Server 2012 R2

The Smart VPN Client is a VPN configuration utility. It makes VPN configuration easy for users. It could support the following VPN schemas, PPTP, L2TP, IPSec, OpenVPN, WireGuard VPN and DrayTek SSL Tunnel.

New Features

- Support SSLVPN with TLS 1.3.

Improvement

- Improved: Improve the long-time WireGuard VPN stability.
- Improved: Restrict VPN 2FA TOTP input field to 6 characters.
- Improved: SSLVPN can be used for verifying the Let's Encrypt server certificate.
- Improved: Add a battery warning message when connecting the VPN with the battery-powered computer.
- Improved: Show a notification message when the user doesn't enter pre-shared key in IPsec & L2TP over IPsec profile.
- Corrected: An issue of tab order in username & PIN code input dialog (mOTP).
- Corrected: An issue with page arrangement for mOTP configuration.
- Corrected: An issue with SSL VPN 2FA authentication when SSLVPN disconnected.
- Corrected: An issue with the pre-shared key not persisting after switching the VPN type.
- Corrected: An issue with IP (0.0.0.0/x) not allowed when importing a WireGuard VPN config.
- Corrected: An issue about SmartVPN Client icon in system tray disappeared after explore.exe crashed.
- Corrected: An issue that Vigor router disconnected VPN automatically if Ping to Keepalive failed three times in a row.

Known Issue

- SmartVPN Client will possibly pop up an error "Hardware failure in port or attached device." if a user tries to reconnect SSL VPN after a long-time performance test with SSL VPN.
