Release Note for VigorConnect

Software Version:	1.9.2
Release Type:	Normal - Upgrade recommended when convenient
Applied System:	Windows 7, 8, 10, 11 / Linux / Raspberry Pi / Docker / Arm64Docker
Applied Models:	All VigorAPs and VigorSwitches. Refer to Compatible Devices at https://www.draytek.com/products/vigorconnect/

VigorConnect is a local network management software that provides centralized AP/switch management for LAN devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

New Features

- Support to manage new models, VigorAP 962C, VigorSwitch P2282x, and VigorSwitch P1281x.

Improvement

- Improved: Password mechanism changed to force admin to change the password from the default password.
- Corrected: An issue with failure to display QR-Code on User>>Two-factor Authentication.
- Corrected: An issue with failure to access to VigorConnect while using 2FA authentication.
- Corrected: An issue with failure to save customized settings after rebooting VigorConnect for some CPE (e.g., Vigor3912s).

Known Issue

- An issue that viewing Flow with FireFox (HTTPS) would block illegal HTTPS certificate issued by Grafana.
